SCHEDULE OF AVERAGE COMPENSATION FOR EXPROPRIATED CANE CROPS 2018/2019 SEASON

[1] MATURE CANE :

PER HECTARE

Average Quality Cane @ 90tc/ha	R45031
Average Quality cane @ 120tc/ha	R60042

**Note: Mature cane calculations should be done for individual farms. Use the following formula for a specific farm:
Mature Cane=Avg tons cane/ha x RV Price x RV% cane**

[2] IMMATURE CANE :

Compensation for immature cane should be related to the age at the time of its expropriation. Such compensation should be at the same proportion as the age of the expropriated cane to the age at which cane is usually adjudged to be mature on the particular farm or in the area. This factor is then applied to the value of mature cane within the range outlined in (1) above

In other words, if on a particular farm cane normally reaches maturity at sixteen months, and the age of the cane to be expropriated is say six months, then compensation should be paid on the basis of six sixteenths of the value of mature cane, of either of the values outlined

[3] CANE ROOTS :

PER HECTARE

Plant cane	R23645
First Ratoon	R18916
Second Ratoon	R15133
Third Ratoon	R12106
Fourth Ratoon	R9685
Fifth Ratoon	R7748

These recommendations are based on average life expectancies for cane roots and may be subject to variation under individual circumstances.

NOTE :

- 1 Compensation for land is additional to the above values.
- 2 In cases where expropriation action prevents a farmer from replanting an area of cane land within the normal fallow period, a claim for the loss of cane growth should be made as in "2" above, for the period of the extended fallow as a percentage of the normal mature crop.
- 3 Compensation values of cane are based on a three year price trend.

NB: These figures do not include VAT

A registered vendor should add VAT to these figures

FIRE CANE SALVAGE RATES

2018/2019 SEASON

Suggested rates where own workers and equipment used.

(Please note that salvage fire cane yields are lower than normal. These rates are therefore not valid for normal operations.)

Fill in only those items which are applicable

Name and address of person to whom assistance was rendered _____

		Rands
A. Transporting of labour & equipment to and from the scene of the fire.		
..... kilometres in van or car	@ R4.15	per km
..... kilometres by tractor/trailer	@ R13.41	per km
..... kilometres by lorry, 8 Ton	@ R9.46	per km
..... kilometres by lorry, 14 Ton	@ R13.24	per km
B. Cutting of burnt cane inclusive of supervisory and support staff.		
..... tons cut and stacked on the ground	@ R61.80	per ton
..... tons cut and loaded onto a vehicle	@ R61.80	per ton
..... tons cut only	@ R44.14	per ton
..... tons of cut cane stacked on ground	@ R31.12	per ton
..... tons of cut cane loaded onto a vehicle	@ R17.66	per ton
C. Infield cane haulage by tractor and trailer inclusive of drivers and assistants.		
..... tons up to 1km (0.5km average lead distance)	@ R16.58	per ton hauled
..... tons up to 2km (1km average lead distance)	@ R21.31	per ton hauled
..... tons up to 3km (1.5km average lead distance)	@ R26.05	per ton hauled
..... tons up to 4km (2km average lead distance)	@ R30.79	per ton hauled
..... tons up to 5km (2.5km average lead distance)	@ R35.52	per ton hauled
For each additional km (0.5km average lead distance) a charge of	R4.74	per ton is suggested
..... tons hauled.....		km @ R per ton hauled
D. Loading and transhipment of burnt cane, inclusive of operators.		
..... tons loaded by infield grab (bell loader)	@ R14.54	per ton
..... tons transhipped by crane	@ R11.89	per ton
..... stockpile and load	@ R16.47	per ton
..... tons transhipped by hand	@ R34.83	per ton
E. Other labour used for such activities as filling drains, point duty, etc.		
..... labourers	@ R146.28	per day
F. Other charges helpers wish to make

NB: These figures do not include VAT, a registered vendor should add VAT to these figures
 Due to low yields, cutter productivity is assumed to be low at 2.5 tons/day (cut and stack)
 and cut only at 3.5 tons/day - this raises the cost per ton substantially
