G/7/2009

SCHEDULE OF AVERAGE COMPENSATION FOR EXPROPRIATED CANE CROPS 2009/2010 SEASON

<u>[1] MATURE CANE :</u>	<u>PER HECTARE</u>
Average Quality Cane	R25 337
Superior Crop	R33 782

[2] IMMATURE CANE :

Compensation for immature cane should be related to the age at the time of its expropriation. Such compensation should be at the same proportion as the age of the expropriated cane to the age at which cane is usually adjudged to be mature on the particular farm or in the area. This factor is then applied to the value of mature cane within the range outlined in (1) above

In other words, if on a particular farm cane normally reaches maturity at sixteen months, and the age of the cane to be expropriated is say six months, then compensation should be paid on the basis of six sixteenths of the value of mature cane, of either of the values outlined in (1) above.

<u>[3] CANE ROOTS :</u>	<u>PER HECTARE</u>
Plant cane	R14 302
First Ratoon	R11 442
Second Ratoon	R9 153
Third Ratoon	R7 323
Fourth Ratoon	R5 858
Fifth Ratoon	R4 687

These recommendations are based on average life expectancies for cane roots and may be subject to variation under individual circumstances.

NOTE :

- 1 Compensation for land is additional to the above values.
- 2 In cases where expropriation action prevents a farmer from replanting an area of cane land within the normal fallow period, a claim for the loss of cane growth should be made as in "2" above, for the period of the extended fallow as a percentage of the normal mature crop.
- 3 Compensation values of cane are based on a three year price trend.

NB: These figures do not include VAT
A registered vendor should add VAT to these figures

FIRE CANE SALVAGE RATES

2009/2010 SEASON

**Suggested rates where own workers and equipment used.
(Please note that salvage fire cane yields are lower than normal. These rates are
therefore not valid for normal operations.)**

Fill in only those items which are applicable

Name and address of person to whom assistance was rendered _____

	Rands
A. Transporting of labour & equipment to and from the scene of the fire.	
..... kilometres in van or car @ R2.63 per km	
..... kilometres by tractor/trailer @ R8.88 per km	
..... kilometres by lorry, 8 Ton @ R5.19 per km	
..... kilometres by lorry, 14 Ton @ R7.71 per km	
B. Cutting of burnt cane inclusive of supervisory and support staff.	
..... tons cut and stacked on the ground @ R28.97 per m. ton	
..... tons cut and loaded onto a vehicle @ R28.97 per m. ton	
..... tons cut only @ R20.69 per m. ton	
..... tons of cut cane stacked on ground @ R10.55 per m. ton	
..... tons of cut cane loaded onto a vehicle @ R8.28 per m. ton	
C. Infield cane haulage by tractor and trailer inclusive of drivers and assistants.	
..... tons up to 1km @ R10.77 per m. ton hauled	
..... tons up to 2km @ R13.85 per m. ton hauled

TOTAL	
NB: These figures do not include VAT, a registered vendor should add VAT to these figures Due to low yields, cutter productivity is assumed to be low at 2.5 tons/day (cut and stack) and cut only at 3.5 tons/day - this raises the cost per ton substantially Contact SASRI for mechanical harvesting cost information
