**SCHEDULE OF AVERAGE COMPENSATION FOR EXPROPRIATED  
CANE CROPS  
2008/2009 SEASON**

<u>[1] MATURE CANE :</u>	<u>PER HECTARE</u>
Average Quality Cane	R20 930
Superior Crop	R27 907

[2] IMMATURE CANE :

Compensation for immature cane should be related to the age at the time of its expropriation. Such compensation should be at the same proportion as the age of the expropriated cane to the age at which cane is usually adjudged to be mature on the particular farm or in the area. This factor is then applied to the value of mature cane within the range outlined in (1) above

In other words, if on a particular farm cane normally reaches maturity at sixteen months, and the age of the cane to be expropriated is say six months, then compensation should be paid on the basis of six sixteenths of the value of mature cane, of either of the values outlined in (1) above.

<u>[3] CANE ROOTS :</u>	<u>PER HECTARE</u>
Plant cane	R13 501
First Ratoon	R10 800
Second Ratoon	R8 640
Third Ratoon	R6 912
Fourth Ratoon	R5 530
Fifth Ratoon	R4 424

These recommendations are based on average life expectancies for cane roots and may be subject to variation under individual circumstances.

NOTE :

- 1 Compensation for land is additional to the above values.
  - 2 In cases where expropriation action prevents a farmer from replanting an area of cane land within the normal fallow period, a claim for the loss of cane growth should be made as in "2" above, for the period of the extended fallow as a percentage of the normal mature crop.
  - 3 Compensation values of cane are based on a three year price trend.
- NB: These figures do not include VAT  
A registered vendor should add VAT to these figures
